

Atlantic Investigations Surveillance Snow Program

With the Winter cold weather upon our area, we know that surveillance may be one of the last things on our clients' minds. Surprising to many, Winter is a great season to determine a claimant's REAL capabilities. Between the hustle and bustle of pre and post Holiday Season shopping, the desire to get out of that dark house, and all of that heavy shoveling, claimants are eager to show how ACTIVE they can be.

The folks here at Atlantic have developed a plan to catch these claimants in the act. We call it our snow program. Let us know if you have a claimant that you would like to document in the snow, and we will put the claimant's file on our diary. When the weatherman says the snow is coming, we will schedule one of our field investigators to perform the surveillance. We have obtained hours of video for dozens of very satisfied Clients through this program and would like to help you too. Give us a call and any of our helpful staff can take your information.
